President's Message

Gary Burleson, PhD

Time flies as it seems that only yesterday I was writing the incoming President's Message. However, during that time, the ITSS Executive Committee has been busy with scheduled teleconferences the second Wednesday of each month. We welcome input from the membership and I want to encourage you to contact one of the members of the executive committee if you have items you want discussed.

Dr. Gary Burleson
President, ImTox SS
2013-2014

Please remember to select membership in the Immunotoxicology Specialty Section when you renew your SOT membership. We are the fourth largest of all 27 SOT Specialty Sections and we continue to grow as more and more toxicologists are interested in immunotoxicology. Central to our success is the integration of toxicology and immunology where we recognize the importance of the immune system in protection against infectious and neoplastic disease, and in the inadvertent immune stimulation by xenobiotics that results in hypersensitivity reactions or autoimmune disease. Your membership is important in keeping us a growing and vibrant Specialty Section.

The ITSS has a new Graduate Student Representative – Aimee Hillegas. Aimee is a PhD student at the University of the Sciences in Philadelphia and was nominated by her PhD advisor Dr. Vandana Miller. Welcome Aimee! Danuta Herzyk is Chair of the Program Committee for the upcoming SOT meeting and has worked hard to obtain proposals for the 2014 SOT. Please consult the SOT Program and support the Immunotoxicology Specialty Section sessions.

The ITSS Executive Committee has initiated a new Award entitled: “Outstanding Senior Immunotoxicologist Award.” We now have the following awards that will recognize immunotoxicology scientists of distinction at every career stage: Outstanding Young Immunotoxicologist Award, Outstanding Senior Immunotoxicologist Award, and the Vos Lifetime Career Achievement Award. Please examine the details and requirements for such an award at the SOT Website: Immunotoxicology Specialty Section Award Descriptions and Deadlines. The deadline for nominations is 18 January 2014. We all know of many deserving candidates. Please take the time to nominate and recognize a deserving immunotoxicologist. I look forward to seeing you at the SOT Annual Meeting on 23-27 March 2014 in Phoenix, Arizona!

Student & Postdoctoral Report

Submitted by Kinta Serve, PhD

Greetings, student and postdoctoral members! Please join me in welcoming our new graduate student representative, Aimee Hillegas, a PhD student from the University of the Sciences in Philadelphia, PA. Welcome, Aimee! In future newsletters, Aimee will keep us informed of the latest Graduate Student Leadership Committee developments and plans. If you have any questions or comments concerning graduate student activities or awards, please contact Aimee at ahillegas@mail.usciences.edu.

As the end of the year approaches, I hope you are all getting excited for the 53rd annual SOT meeting. Remember that there are many great opportunities for students and postdocs to get involved, including creating a video for the YouTox challenge. Students and postdocs are invited to submit a short video answering the question “Why did I become a toxicologist?” Cash prizes will be awarded, so get creative and have some fun! (Deadline is Jan 15; more information available at <http://toxicology.org/ai/spd/studentservices.asp>). Additionally, the deadline for award nominations is quickly approaching. Awards available to students and postdoctoral ImmunoTox members include Best Presentation by a Student, Best Presentation by a Postdoctoral Trainee, and Best Paper of the Year. Many travel awards are also available through the specialty section and through SOT; check out the websites for details and deadlines.

A big thank you to all those who attended the Postdoctoral Assembly webinar in September entitled “Exploring Alternative Career Paths in Toxicology.” This webinar was presented as part of Postdoc Appreciation Week. If you weren’t able to attend, the recording is available on the SOT website.

Lastly, I’d like to remind everyone to make sure their SOT member information is current and correct so you don’t miss email reminders of the numerous events and activities available to students and postdocs! Upcoming events include Chat with an Expert, Poster Tours, and Student/Postdoc Mixers at the annual SOT meeting. If you would like to get involved in planning these great events, or have any comments/suggestions, please contact Kinta Serve (servkint@isu.edu) or Aimee Hillegas (ahillegas@mail.usciences.edu).

Regulatory Committee Report

**Submitted by Peter Thomas, PhD.
Chair, Regulatory Subcommittee**

The following regulatory update may be of interest to the Immunotoxicology specialty section

EPA Conducts Retrospective Analysis of Pesticide TDAR assay.

In response to a CropLife America (CRL) request, that the EPA consider granting waivers for the OPPTS. 870.7800 immunotoxicity study, the Agency conducted a retrospective analysis of over 170 pesticide studies where this guideline was followed. This analysis included study data from 155 chemicals to determine (1) whether the results of the guideline-driven immunotoxicology study impacted human health risk assessment; (2) if there is sufficient justification for granting waivers for this study; and (3) propose a path forward.

The guideline-driven immunotoxicity study (TDAR assay) is designed to measure the immunosuppressive potential of a chemical by measuring the antibody response to a T-cell dependent antigen (SRBCs) in rodents treated for at least 28 days.

As background, CRL conducted a retrospective evaluation of 82 TDAR studies and noted that a reduction in TDAR was noted in 4/82 studies at the high dose only. They concluded that in no case was the finding the most sensitive endpoint when compared to other toxicity endpoints.

In the EPA review, all 155 chemicals were assessed by the TDAR using the PFC assay or ELISA methods in rats or mice of both genders. In addition, a Natural Killer cell activity assay was conducted for 11 chemicals. For the majority of chemicals tested, there was a lack of toxicologically-relevant effects on the T-dependent antibody response. No effect on the TDAR response up to the highest dose was seen in 140 of 155 chemicals tested. Ten percent of the chemicals (15) produced suppression of the anti SRBC TDAR response at “relatively high doses”. For 9 of the 15 chemicals, immunotoxicity was seen at the same, or at higher doses than which systemic toxicity was noted.

To assess the impact of the immunotoxicity study on human health risk assessment, a comparison was made of the NOAEL/LOAEL established for the TDAR to the “points of departure” selected for different risk assessment scenarios for the various chemicals. The EPA stated that since immunotoxicity was not the most sensitive endpoint in the database of the chemicals used in this analysis, it would not have been used for risk assessment. Based on this and other factors, the Office of Pesticide Programs will be receptive to requests that it grant waivers for the immunotoxicity study. Such waivers should be made on a case-by-case basis and include a scientifically sound rationale.

US Environmental Protection Agency Memorandum “A Retrospective Analysis of the Immunotoxicity Study (OCSP Test Guideline 870.7800). Feb 2013

Call for Nominations from the Awards Committee

*Submitted by Peyton Myers, PhD.
Chair, Awards Committee*

It's that time again! Awards for our outstanding Immunotoxicology colleagues!

Recognizing the scientific contributions of our students and colleagues is one of the most important things we do. It not only recognizes them, but also publicizes the accomplishments of our Specialty Section toward the mission of SOT. The Awards Committee strongly encourages you to nominate your colleague(s), including self-nominations, for the various awards presented by the Immunotoxicology Specialty Section. We hope to continue to see the same high quality of nominees that challenges the Committee to choose among our very best!

Also note, we have a NEW Award this year! The Outstanding Senior Immunotoxicologist Award goes to the outstanding candidate that has contributed to immunotoxicology for more than 10 years (the limit for the “young” investigator award) but has not yet received the Vos Career Award! This award is designed to fill the gap in our awards platform to recognize many of our outstanding senior investigators that continue to advance the field of immunotoxicology.

Vos Award – Lifetime Career Achievement Award in Immunotoxicology

An award named for the late Prof. Jeff Vos shall be presented to a Senior Investigator with outstanding achievements in immunotoxicology. Nominations should be submitted to Gary Burleson by January 18, 2014.

Outstanding Senior Immunotoxicologist Award

Senior Investigator whose work has made significant contributions to the field of Immunotoxicology. This award is for scientists in academia, industry, or those who have had an impact on regulatory issues. Nominations should be submitted to Danuta Herzyk by January 18, 2014.

Outstanding Young Investigator Award

Promising young investigator(s) who have already had an impact on academic, regulatory or industrial areas of immunotoxicology shall be awarded. Nominations should be submitted to Danuta Herzyk by January 18, 2014.

Best paper of the Year Award

This honored award shall go to the authors of the best paper in immunotoxicology published between Jan 1, 2013 and December 31, 2013. Date of first publication (e-version or paper version) is considered the publication date for awards consideration purposes. Nominations should be submitted to Peyton Myers by January 18, 2014.

Call for Nominations from the Awards Committee (continued)

Best Presentation by a Postdoctoral Trainee Award

Nominees are asked to submit a complete written version of an immunotoxicology presentation that is to be made at the 2013 SOT Annual Meeting, along with a letter of nomination from the Postdoctoral Trainee's advisor. Nominations should be submitted to Peyton Myers by January 18, 2014.

Best Presentation by a Student Award

Nominees are asked to submit a complete written version of an immunotoxicology presentation to be made at the 2013 SOT Annual Meeting, along with a letter of nomination from the student's advisor. Nominations should be submitted to Peyton Myers by January 18, 2014.

HESI Immunotoxicology Young Investigator Travel Award

This award is offered by ILSI HESI to encourage young investigators within 5 years of receiving a Ph.D. to present their research at the 2014 SOT Annual Meeting. Nominations should be submitted to Gary Burleson by January 18, 2014.

Detailed descriptions of all the awards are on the website:

<http://www.toxicology.org/ISOT/SS/imtox/deadlines.asp>.

Gary Burleson (gburleson@brt-labs.com), Danuta Herzyk (danuta_herzyk@merck.com), and Peyton Myers (Peyton.Myers@fda.hhs.gov) will accept nominations after December 1, 2013

SOT 2014 meeting - upcoming deadlines

Deadlines

2nd abstract submission – January 6, 2013

Early Bird Registration – January 31, 2014

Standard Registration – February 28, 2014

Financial Report (2012-2013)

Submitted by Haley Neff-LaFord, PhD

The fiscal year runs for 12 months ending on June 30th (Data shown for end of year, June 2013)

| ImTox SS General Ledger | |
|---|---------------|
| Ordinary Income/Expense | |
| Income | |
| Contributions | 2000 |
| Membership Dues | 5445 |
| Misc. Income | |
| Registration | 2706 |
| Interest | 802 |
| Total Income | 10,953 |
| Expense | |
| Awards - Sections | 1,650 |
| Plaques | 790 |

| Total Return | 5,036 |
| Expense | |
| Awards | 1,650 |
| Total Expense | - |
| Excess (Deficiency) of Revenue over Expenses | 6186 |
| Net Assets Beginning of year | 39,110 |
| Net Assets End of Year | 45,297 |

All entries listed in USD, rounded to the nearest dollar. Income includes dues (paid with SOT membership) and registration (based on the number of ImTox SS members at the SOT Annual Meeting).

Expenses include the ImTox SS Executive Meeting & Reception held at the SOT Annual Meeting, miscellaneous expenses (monies for ImTox Pool of Lecturers, Student/Postdoc Mixer etc.)

Program Committee Update for 2014 SOT meeting

Submitted by Danuta Herzyk, PhD

On behalf of the 2013-2014 ITSS Program Committee, I want to thank everyone for submitting their proposals for the 2014 SOT Annual Meeting. Our Specialty Section will be represented at the meeting in Phoenix, AZ with three sessions listed below:

Symposium – To Bug or Not to Bug the Immune System: Benefits and Consequences of Altering the Microbiome

Co-Chairs: Victor J. Johnson and Berran Yucesoy

Symposium – Ocular Immunotoxicology: A Privileged View

Co-Chairs: Brian Christian and JoAnn Schuh

Workshop - Contribution of Nonimmune Cells to Adverse Immune Responses: Implications for Toxicology

Co-Chairs: Peer Karmaus and Barbara Kaplan

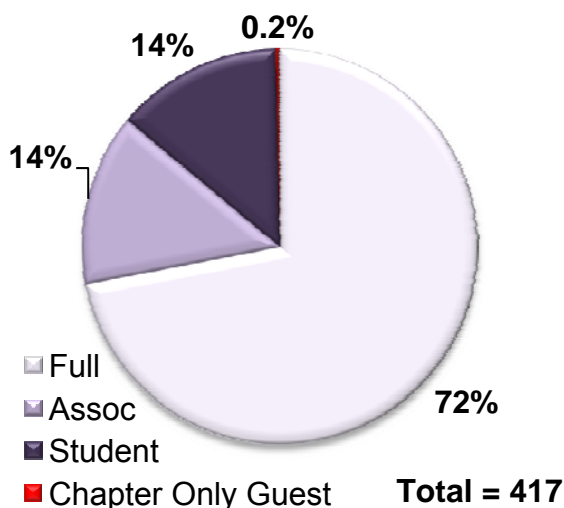

While the number of ITSS-sponsored programs is down from the last year where we had five programs (2 Symposia, 1 Workshop, 1 CEC and 1 Informational Session), it reflects the fact that all proposals were submitted primarily as symposia, the most competitive program category. At the same time, the higher bar for acceptance of proposals results from both the greater number of SOT Specialty Sections and the greater quality of all submissions. Therefore, the Program Committee extends congratulations not only to those who have been accepted but to ALL who submitted their valuable proposals.

Membership Committee Report

Submitted by George DeGeorge, Ph.D

By Membership Category

Nov 2013

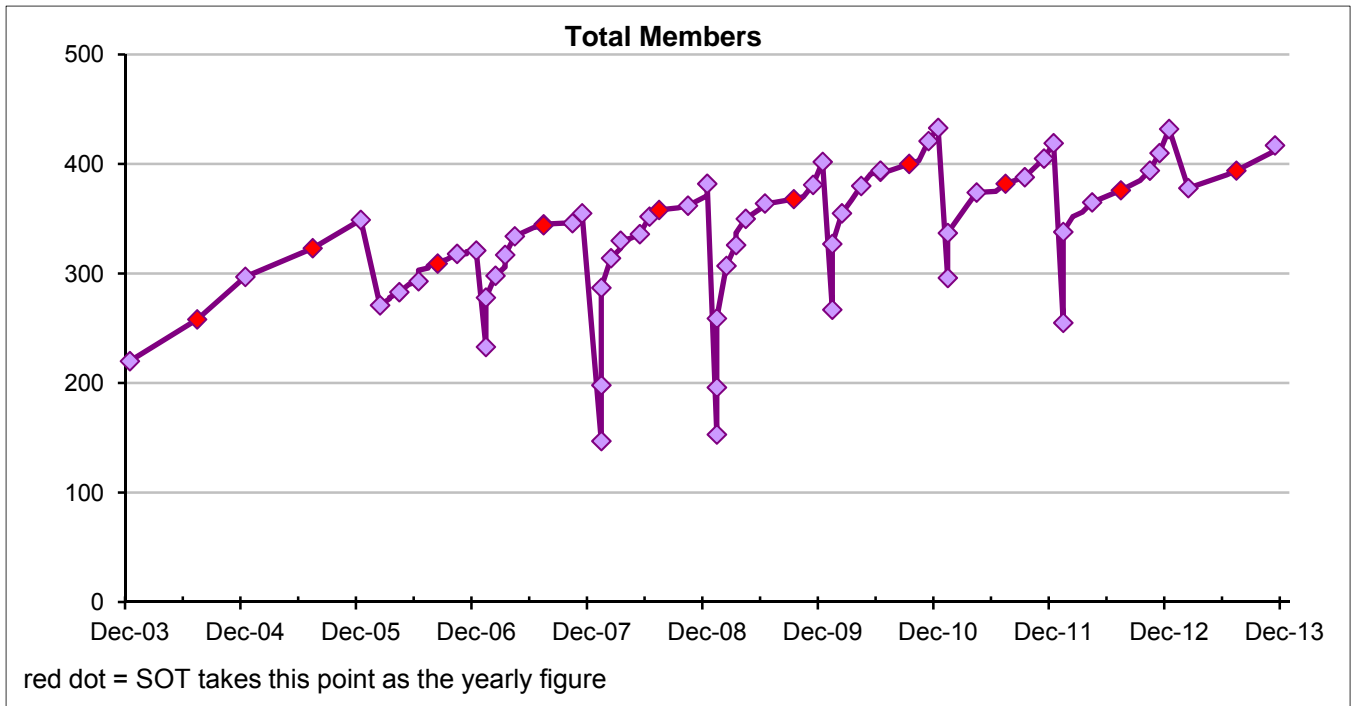

By Organization Category

Nov 2013

Membership Committee Report (continued)

Note:

- The "dip" occurs when SOT deletes those who haven't renewed
- "estimated" in the graph below indicates an arbitrary 5% increase over Dec of last year

Papers from Meetings

Altamirano-Lozano MA, Alvarez-Barrera L, Mateos-Nava RA, Fortoul TI, and Rodriguez-Mercado JJ. Potential for genotoxic and reprotoxic effects of vanadium compounds due to occupational and environmental exposures: An article based on a presentation at the 8th International Symposium on Vanadium Chemistry, Biological Chemistry, and Toxicology, Washington DC, August 15–18, 2012. *J Immunotoxicol* 11:19-27, 2014.

Fortoul TI, Rojas-Lemus M, Rodriguez-Lara V, Gonzalez-Villalva A, Ustarroz-Cano M, Cano-Gutierrez G, Gonzalez-Rendon SE, Montaño LF and Altamirano-Lozano M. Overview of environmental and occupational vanadium exposure and associated health outcomes: An article based on a presentation at the 8th International Symposium on Vanadium Chemistry, Biological Chemistry, and Toxicology, Washington DC, August 15–18, 2012. *J Immunotoxicol* 11:13-18, 2014.

Reviews/ Books/Case Reports

Ainscough JS, Gerberick GF, Dearman RJ and Kimber I. Danger, intracellular signaling, and the orchestration of dendritic cell function in skin sensitization. *J Immunotoxicol* 10:223-234, 2013.

Botti G, Cerrone M, Scognamiglio G, Anniciello A, Ascierio PA and Cantile M. Microenvironment and tumor progression of melanoma: New therapeutic perspectives. *J Immunotoxicol* 10:235-252, 2013.

Dietert RR. Developmental immunotoxicity, perinatal programming, and non-communicable diseases: Focus on human studies. *Adv Med*, 2013.
<http://www.hindawi.com/journals/amed/aip/867805/>

Dietert RR, Dietert J. *Science Sifting: Tools for Innovation in Science and Research*. World Scientific Publishing, Singapore & London, 2013.

Grove RG, Luster MI, Fail PA and Lippes J. Quinacrine-induced occlusive fibrosis in the human fallopian tube is due to a unique inflammatory response and modification of repair mechanisms. *J Reprod Immunol* 97:159-166, 2013.

Recent Immunotoxicology Publications

Krejsa CM, Blazej Neradilek M, Polissar NL, Cox N, Clark D, Cowan L, Bussiere J and Lebrech H. An inter-laboratory retrospective analysis of immunotoxicological endpoints in non-human primates: Flow cytometry immunophenotyping. *J Immunotoxicol* 10:361-372, 2013.

Lawrence BP and Vorderstrasse BA. New insights into the aryl hydrocarbon receptor as a modulator of host responses to infection. *Semin Immunopathol* 35:615-626, 2013.

Luster MI. A historical perspective of immunotoxicology. *J Immunotoxicol* epub 2013 <http://informahealthcare.com/doi/abs/10.3109/1547691X.2013.837121>

Pfau JC, Hurley K, Peterson C, Coker L, Fowers C and Marcum R. Activation and trafficking of peritoneal B1a B-cells in response to amphibole asbestos. *J Immunotoxicol* 11:90-98, 2014.

Ponce RA, Gelzleicher T, Haggerty HG, Heidel S, Holdren MS, Lebrech H, Mellon RD and Pallardy M. Immunomodulation and lymphoma in humans. *J Immunotoxicol* 11:1-12, 2014.
Selgrade MJK, Blain RB, Fedak KM and Cawley MA. Potential risk of asthma associated with in utero exposure to xenobiotics. *Birth Defects Res C Embryo Today* 99:1-13, 2013.

Other Notable Items

JOB OPPORTUNITIES

We are starting a new section to benefit anyone who is looking for a new job or a career transition. If you are aware of a job opening that you would like to see posted here, please email the details to the ImTox Communications committee chair, Ashwini Phadnis-Moghe phadnisa@msu.edu. We will update this section in the upcoming newsletters and also post them online on our website.

Employers who have job openings and would like to advertise them in our newsletter can send the information to us in this format.

Position Available:

Institution or Company: Bottles R Us

Description: Chief Bottlewasher

Contact: Dr. Serve

SAVE THE DATE!

53rd Annual Society of Toxicology Meeting

March 23-27, 2014

Phoenix, Arizona

2nd Abstract Submission deadline: January 6, 2014
